- The applicant is affiliated with a government agency and exempted from special license fees through rule or policy.
- Other (provide details in comments below):

Comments	The Department has been partnering with Trout in the classroom program since 2015. The program started with three in 2015. There are 40 schools across the state registered to participate in the 2021-2022 school year. The Department provides triploid eggs and fish food to each school. Trout Unlimited provides all the necessary aquaria equipment to maintain the fish alive. This is an excellent program that allows the Department to reach thousands of students and their families across Arizona. Students learn about the Departments' mission, water conservation, ecosystems, fish culture and sport fishing in the state. Another benefit is to introduce students to fisheries and make them aware of future professional opportunities in the Department after college.
