

ARIZONA TROUT IN THE CLASSROOM

Application Form Trout in the Classroom (TIC) Program School Year 2024 - 2025

Teacher Name: _____ Teacher Cell Phone: _____

Name of School: _____ Teacher Email: _____

School District: _____ Classroom Phone: _____

Address: _____ School Phone: _____

Street, State, Zip: _____ Name of Principal: _____

County: _____

Program Support Factors (Check if the answer is "Yes" or fill out appropriately)

- The Principal at your school is supportive of your proposed participation in the Trout in the Classroom (TIC) Program.
- I will make myself available to attend a 1-day mandatory annual workshop.
- I will be available to answer correspondence from TIC coordinators (Trout Unlimited and AZ Game & Fish Department) and agree to submit all required paperwork and forms on time.
- I am interested in visits by speakers to talk about appropriate water and conservation topics.
- I am interested in information for a potential class field trip during the school year or at the conclusion of the TIC program.
- I can secure funding to cover the cost of the field trip (i.e., substitute, transportation). If not, please explain the challenges and limitations.

Student Participation

- ___ Grade level(s) of participating students.
- ___ An approximate number of students participating in TIC program lessons and activities (not just tank views).
- ___ An approximate number of other students, teachers, parents and school visitors who may see the TIC equipment, display and fish during the school year.

Aquarium Equipment Setup Dates and Support

There is a very limited time window of when trout eggs will be available to schools. Because of this, it is imperative for teachers to have their aquariums set up a minimum of 21 days prior to receiving eggs into their classroom. Please indicate which date you will be ready for the delivery of trout eggs:

- November 15, 2024 (tentative)
- December 15, 2024 (tentative; secondary date with advanced approval)
- ___ On a scale of 1 to 10 (ten being the highest experience), how informed do you think you are to be able to conduct TIC and maintain an aquarium prior to training (note: this will not affect the selection of a school; it is to help develop the proper level of workshop training and assignment of volunteer support).

The following are the expectations, conditions and requirements of participation in the Arizona Trout in the Classroom (TIC) program:

1. Attend a mandatory, one-day teacher workshop for the TIC program. Once a teacher has been accepted into the program, they will be notified by a TU representative of a workshop date, time and location.
2. Only the applicant on this form is authorized to acquire, incubate, and possess trout eggs/fish.
3. No eggs or fish acquired through the TIC program may be possessed, transferred, released or otherwise disposed of, except as authorized by AZGFD staff and in accordance to the Department's *Wildlife Holding License* and *Wildlife Holding Report* forms.
4. All eggs and/or fish remain the property of the AZGFD and decisions on the final disposition remain solely with the AZGFD.
5. The *Wildlife Holding License Application* (Form 2717-A) and *Wildlife Holding Report* (Form 2717-B) are required forms by the AZGFD. They will be completed to the best of their ability by the teacher. Submission of completed forms will be done in a timely manner and in accordance with the designated deadlines specified on the reports and/or by AZGFD staff.
6. Trout eggs will be delivered and fish picked up in appropriate containers.
7. Eggs and fish will *not* be released or given to students under any circumstances.
8. Fish, tanks and other related TIC equipment will be properly maintained in such a way that ensures the continued quality health of the eggs and/or fish. A completed Loan Equipment Agreement with Trout Unlimited is required prior to the start of the program.
9. Failure to complete and/or submit required forms (Wildlife Holding License; Wildlife Holding Report) or failure to comply with AZGFD rules and regulations may result in the teacher's eligibility being revoked for future participation in the Arizona TIC program.

Under a Wildlife Holding Permit from the Arizona Game and Fish Department (Department), R12-4-401, trout, all species, are considered restricted wildlife and therefore require a Wildlife Holding Permit to receive, possess, and transport within the state of Arizona. In addition, under the General Provisions and Penalties for Special Licenses, R12-4-409 section F, the Department has the authority to place additional stipulations on a special license application.

I certify that the statements made by me in this application are complete and accurate to the best of my knowledge.
